

## K-Band Low Noise Amplifier 18-26.5 GHz: FLNA-42-0001

Farran's FLNA-42-0001 is a full K-Band low noise amplifier providing typical 33 dB gain and 2.8 dB noise figure.

### Key Facts:

- Low noise figure.
- Full waveguide band.
- Single power supply required.
- Compact and lightweight.

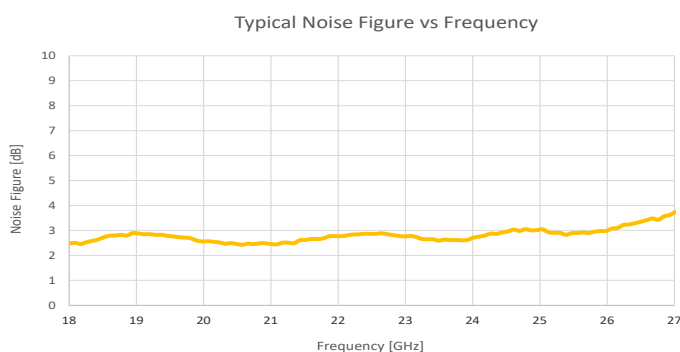

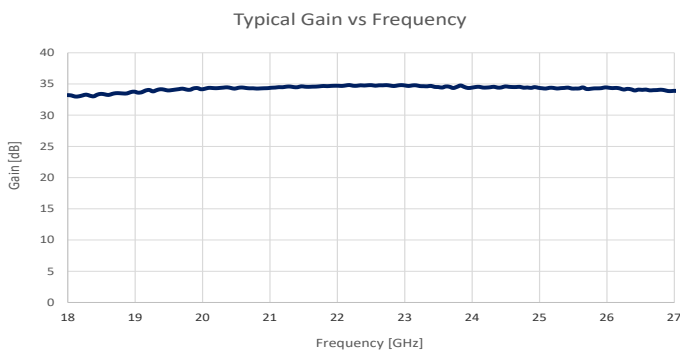

### APPLICATIONS

- Communication receivers
- Radar front ends
- Point to point communication

### ACCESSORIES

- User manual

"We have made many Farran purchases, including amplifiers, mixers and multipliers. They are all high-performance devices and always meet our expectations. Farran supplied each component with comprehensive set of test results and a manual, which is not necessarily a given in this industry. Moreover, due to the accessibility of Farran's engineering team we were able to get CAD models of the devices prior to placing an order. This was a nice touch from the Farran team and helped with integrating the components into our system so that we could meet our project's deadline with confidence."

**Microwave Circuit Designer & Engineer, Multinational Electronic Test Equipment Manufacturer.**

## Product Specification

Specification	Unit	Min	Typ	Max
Operating Frequency	GHz	18	-	26.5
Gain	dB	-	33	-
Output P1dB	dBm	-	+12	-
Noise Figure	dB	-	2.8	4
Input Reflection Coefficient	dB	-	-10	-
Output Reflection Coefficient	dB	-	-10	-
Input / Output Port	-	K (F) Connector		
DC Power Requirements	V/mA	-	6/150	-
Case Operating Temp. (nom.)	deg. C	-20	-	+50
Dimensions (L x W x H)	mm	54 x 30 x 11		

### SERVICES AVAILABLE

- Technical Support
- Installation and Setup
- Maintenance
- Application Support
- Hardware Support

For more information on any of our products or services please visit our website: [www.farran.com](http://www.farran.com)

### TECHNICAL SUPPORT

- Technical support provided directly by our knowledgeable and friendly engineers.
- Support for pre- and post-purchase: system configuration, installation and troubleshooting.

### PRODUCT INSIGHTS

- For more product insights register at [www.farran.com/customer](http://www.farran.com/customer)
- Additional information: test data, CAD drawings and 3D models available.

### WARRANTY

- Standard 1 year warranty.

### Specification Definitions

**Nominal value (nom.)** – ensured by design, not tested. **Measured value (min, max)** – expected and warranted product performance obtained from the actual measurements of product sample. **Non-traceable measured value (n. trc. meas.)** – expected product performance obtained from the actual measurements of a product sample by means of using Farran's own equipment and methods. Traceable only to Farran laboratory equipment. **Typical data (typ.)** – value that represents the product specification met over 90% of bandwidth or a mean value. **Specifications without limits** – represent the warranted product performance; with values of no or a negligible deviation from the given value and as such have a secondary impact on the product performance.
