

# WR-10 Gain Stage Amplifier 75-110 GHz: FPA-10-0010

Farran's FPA-10-0010 is a wideband Gain Stage WR-10 waveguide band Amplifier providing +17 dBm typical output power.

## Key Facts:

- Flat gain
- Excellent input/output match
- Wide bandwidth
- Compact and lightweight

## APPLICATIONS

- Communication receivers
- Radar front ends
- Gain Stage amplifiers
- Point to point communication

## ACCESSORIES

- User manual

"We have made many Farran purchases, including amplifiers, mixers and multipliers. They are all high-performance devices and always meet our expectations. Farran supplied each component with comprehensive set of test results and a manual, which is not necessarily a given in this industry. Moreover, due to the accessibility of Farran's engineering team we were able to get CAD models of the devices prior to placing an order. This was a nice touch from the Farran team and helped with integrating the components into our systems so that we could meet our project's deadline with confidence."

**Microwave Circuit Designer & Engineer, Multinational Electronic Test Equipment Manufacturer.**

## Product Specification

Specification	Unit	Min	Typ	Max
Operating Frequency	GHz	75	-	110
Gain	dB	-	12	-
Output Power (saturated)	dBm	-	+17	-
Test Port Interface	-	WR-10 UG-387/U-M		
Case Operating Temperature (nom.)	deg C	-20	-	+50
DC Power Requirements	V / mA	-	15/170	18/220
Dimensions (L x W x H)	mm	36 x 20 x 20		

### SERVICES AVAILABLE

- Technical Support
- Installation and Setup
- Maintenance
- Application Support
- Hardware Support

For more information on any of our products or services please visit our website: [www.farran.com](http://www.farran.com)

### TECHNICAL SUPPORT

- Technical support provided directly by our knowledgeable and friendly engineers.
- Support for pre- and post-purchase: system configuration, installation and troubleshooting.

### PRODUCT INSIGHTS

- For more product insights register at [www.farran.com/customer](http://www.farran.com/customer)
- Additional information: test data, CAD drawings and 3D models available.

### WARRANTY

- Standard 1 year warranty.

### Specification Definitions

**Nominal value (nom.)** – ensured by design, not tested. **Measured value (min, max)** – expected and warranted product performance obtained from the actual measurements of product sample. **Non-traceable measured value (n. trc. meas.)** – expected product performance obtained from the actual measurements of a product sample by means of using Farran's own equipment and methods. Traceable only to Farran laboratory equipment. **Typical data (typ.)** – value that represents the product specification met over 90% of bandwidth or a mean value. **Specifications without limits** – represent the warranted product performance; with values of no or a negligible deviation from the given value and as such have a secondary impact on the product performance.
